

Meeting Pod

Open Ring

A Space To Think. A Place To Meet.

The Open Meeting Pod is an office pod designed to create a focused, comfortable space for collaboration. Crafted from durable composite material and formed in our signature spherical shape, it makes a striking architectural statement while enhancing acoustic performance.

Inside, the pod is lined with high-performance acoustic foam and finished with premium faux leather seating, providing both sound absorption and all-day comfort. A free-standing table is included as standard, making the pod ideal for informal meetings, catch-ups, and focused discussions.

Customise your Meeting Pod with optional mains power, coloured shell finishes, and a choice of fabrics and acoustic foam colours to seamlessly integrate with your workspace and brand.

A Perfect Fit, Every Time.

Our Meeting Pods are **available in 2, 4, 6, and 8 person configurations**, ensuring there's a solution for every type of meeting, from quick catch-ups to collaborative team sessions.

Each size is carefully proportioned to maintain the pod's signature spherical form while delivering consistent acoustic comfort, generous seating, and an inviting sense of space. Whether you're creating intimate meeting zones or larger collaboration hubs, our range of sizes allows you to plan with flexibility and design with confidence.

Integrated Comfort, Seamless Design.

Seating within the Meeting Pod is thoughtfully integrated into the structure of the pod itself. The sculpted shell design incorporates the seating directly into the frame, creating a seamless interior with no loose components and no wasted space.

Each seat is upholstered in durable **faux leather** and cushioned with **3" recycled foam**, providing comfort and support for extended meetings while reinforcing the pod's sustainable credentials. The result is a clean, cohesive interior where design, comfort, and practicality are perfectly aligned.

A Surface For Every Discussion.

Every Meeting Pod is supplied with a **free-standing table** as standard, providing a practical and refined surface for meetings, laptops, and collaborative work.

The table features a white Egger tabletop, chosen for its durability and clean, modern appearance, paired with black steel table bases that offer strength, stability, and a subtle industrial contrast. The free-standing design allows flexibility within the pod, ensuring the layout remains functional, uncluttered, and adaptable to different meeting styles.

A Softer Space For Clearer Conversation.

The interior of the Meeting Pod is **fully lined with egg-box acoustic foam**, carefully selected to enhance both comfort and sound control. The sculpted foam surface absorbs ambient noise and reduces reverberation, creating a calmer environment for focused discussion.

Beyond its acoustic performance, the foam lining softens the pod's interior, contributing to a comfortable, enclosed feel that supports longer meetings and clearer communication. An essential balance of form, function, and wellbeing.

Table Finishes

A close-up photograph of various interior design samples arranged on a light-colored wooden surface. In the foreground, there is a large, textured grey material, possibly a fabric or foam sample, with a wavy top edge. To its right, a stack of color swatches is visible, along with a larger color palette featuring a grid of various shades. In the background, there are more fabric swatches in different colors and textures, including a dark grey one and a light-colored one. A portion of a dark-colored object, possibly a chair or table leg, is visible on the right side. The overall scene suggests a design studio or a selection process for interior materials.

**Designed By Us.
Finished By You.**

Make It Yours In Any Colour.

For those looking to make a statement, the Meeting Pod offers complete exterior personalisation. The signature spherical shells **can be finished in any RAL colour as an optional upgrade.**

This flexibility allows you to align the pod with brand colours, create a standout accent within your workspace, or bring a subtle architectural tone to the aesthetic. With limitless colour possibilities, the pod becomes not just a functional space, but a bold expression of identity.

Silence, Personalised.

As an optional upgrade, the Meeting Pod acoustic **foam liners can be sprayed and finished in any RAL colour**, allowing the interior to be tailored to your brand, workspace, or design scheme.

This custom finish maintains the foam's acoustic performance while adding a strong visual identity. Whether you choose to blend seamlessly into your environment or make a bold design statement. The result is a pod that performs acoustically and expresses character through colour.

Comfort That Shapes The Quiet.

As an optional upgrade, the Meeting Pod can be fitted with a **bolstered foam interior**, replacing the standard acoustic foam liners with individually cushioned, upholstered panels.

Available in a wide choice of fabrics, the bolstered liners enhance comfort while maintaining excellent acoustic performance. The layered, padded construction helps absorb sound within the pod, creating a quieter, more focused environment, while the upholstered finish delivers a distinctly more premium look and feel, ideal for client-facing and design-led offices.

Power,
Perfectly
Integrated.

Power, Perfectly Integrated.

Elevate your pod experience by adding **mains power as an additional option**. Designed to support modern working, with power and lighting seamlessly integrated into the space. The mains power option includes two Pixel units from OE Electrics, providing convenient access to a **UK 3-pin socket, USB, and USB-C charging**, ideal for laptops, phones, and meeting technology.

Manufactured to the highest standards, OE Electrics Pixel units are backed by a 10-year warranty, ensuring long-term reliability and peace of mind.

To enhance efficiency and reduce energy use, mains power option also features **PIR-activated LED lighting**, automatically illuminating the interior when the pod is in use and switching off when vacant.

Thoughtfully engineered power, without compromise.

Your Space. Your Style.

Add a bold personal touch to your Meeting Pod by using any fabric from the Gabriel 'Cura' range. This **customisation option** for the seating and bolstered foam liners lets you introduce colour, texture, and personality to your workspace.

With **50 colour options** to choose from, you're sure to find the perfect match to reflect your brand identity or complement your office aesthetic. A simple upgrade that speaks volumes.

Made from 100% post-consumer recycled polyester. It fuses modern performance with a warm, casual aesthetics and a soft, voluminous touch. The fabric's matt, slightly heathered and natural-looking texture imitates the aesthetics of natural fibres, adding feel-good factor and a touch of classic luxury to any type of furniture.
