### NEW KHARA

#### Concentration space - 1 person

Seatbox New Khara is the perfect acoustic booth for those who need to stay focused and productive when working alone.

With its understated, elegant design, this discreet acoustic booth provides the ideal environment for making phone calls, video conferences or working on projects.

The Seatbox New Khara is soundproofed, so you can be sure that your conversations and work will not be disrupted.

This range features the optional ARS® (Air Cooling System) to help cool the temperature inside the pod by up to 3 degrees.

It is equipped with an ergonomic table and external LED lights which are activated by a presence detector.

**Dimmer**  
Light and ventilation

A 5-speed dimmer switch for light and ventilation is mounted on the central column, allowing you to adjust the intensity of each piece of equipment as you wish. By default, smart pods are equipped with light, ventilation and connectors. They are activated when a person enters the smart pod.

The air inside the smart pod is fully regenerated every minute (intensity adjustable with the dimmer) When the smart pod is no longer occupied, it will remain on and continue to ventilate for 3 minutes to ensure that the air is fully regenerated for the next use. Once these 3 minutes have elapsed, the light and ventilation switch off automatically.

Of course, the smart pod can be occupied directly after the last use without waiting the 3 minutes.

In a SEAT BOX smart pod, the recommended time of use is estimated at 1h - 1h.

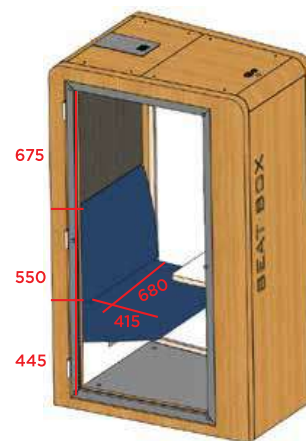

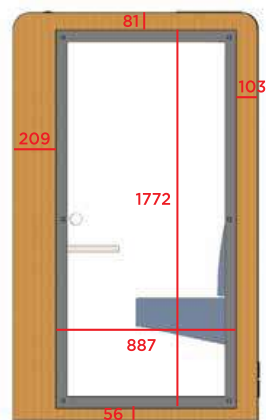

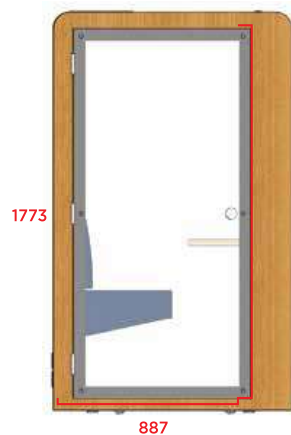

**Connectivity:**  
1 x 110v + USB A + USB C  
Option: 1 x HDMI + 1 X RJ45

## INNOVATION AND LUXURY | OPTION

### WOOD - BRUT CP

The structure of our smart pods is made of birch plywood. This type of plywood is produced from 100% birch wood, obtained by gluing adjacent layers together with crossed, right-angled wires of high quality and durability. It offers a number of advantages, including durability, wear resistance and resistance to more aggressive environments.
